Turkeys have practically disappeared from the market, the season being the cause, but one could get a very good substitute in the way of roasting spring chickens at 20 cents per pound. There was no change in the fruit or vegetable markets as to price, but the supply was large and of a superior quality. Everything in sight was taken, no matter what the price was, but the dealers say that they will have fresh offerings when they open up Monday morning. Yesterday's quotations:

Meats.

The week was uneventful in local dividend paying commercial stocks. Prices remained almost at a standstill. They seem to have reached a high water mark for the present at least. Capital has a tendency to drift into other channels, especially into real estate. This tendency is resulting in a lack of activity that has not been noted in months before. The strength of the local market is illustrated by the following quotations on some of the more popular stocks:

No Clouds in the Sky.

Business conditions in general were exceptionally good during the week. Banks report an abundance of money at low rates of interest; collections at low rates of interest; collections were fair throughout the week; the volume of business, both wholesale and retail, was satisfactory; and the fine crop prospects made the outlook for the future especially good. The steady stream of wealth pouring into the city from the mines and smelters played no small part in producing the bealthful hissiness tone everywhere and healthful business tone everywhere ap-

Building operations were carried on throughout the week without hind-rance. Building permits were issued for a large number of houses, mostly single homes and terraces. Talk of a number of business blocks was persis-tent and important developments along

sidewalk districts laid out in the south-western and southeastern parts of the city: the paving on Main street to the Salt Palace, the paving of Market street, the paving of North Main street to Capitol hill, the paving of North Temple street, and the enormous amount of detached work in the way of sidewalks, water mains, sewers, cross-ings,—all taken together give the city an air of progress that it never wore an air of progress that it never wore before. The most spectacular piece of work being done by the city is the paving of Brigham street. Persons in-terested are just beginning to get some faint idea of what the beauty of the street will be when the work is com-pleted, and all opposition to the im-provement is gradually dying out.

Water and Sewer Bonds. One of the interesting developments of the week in the line of public improvements was the assurance given by the Mutual Life Insurance company that the \$1.000,000 water and sewer bonds would be taken at the price agreed their providing the supreme court of the state would affirm the legality of bonds, and prompt steps ta-ken to have the matter tested in court. The opinion prevails that the decision of the court will be favorable to the bond issue. Should this prove to be the case, work on the project of bringing the water of the Big Cottonwood. teeth is painless. 162 Main street, Auerbach Bldg. Phones B. 1120-K. Ind. 117.

Into the city and the construction of the main sewer on Ninth South will be started with the least possible delay. It is the intention of the city administration to push work on both projects with all possible vigor just as soon as the proceeds of the bonds are made available.

Western Pacific Influence.

All the causes mentioned above tend-ing to push Salt Lake to the from sink into significance when compared to the influence of the Western Pacific actual work of construction will not be delayed beyond Sept. 1; and that no obstacle will be permitted to stand in the way of the rapid completion of the road. At the directors' meeting to be held in San Francisco the coming week there will be developments that are expected to attract the attention of the entire railroad world to this immediate
